EDUCATION

PARUL UNIVERSITY

Bachelor of Technology

Major in Computer Science and Engineering

Cumulative GPA: **7.77/10.0**

Relevant Coursework: Data Analysis, Software Engineering, Machine Learning, Algorithms, Artificial Intelligence

Vadodara, GJ

Sept 2022 – May 2025

GUJARAT TECHNOLOGICAL UNIVERSITY

Diploma

Major in Computer Engineering

Cumulative GPA: **8.62/10.0**

Relevant Coursework: Operating System, Database Management System, Data Structure, Dynamic Web Page Development

Vadodara, GJ

Jun 2019 – Jul 2022

WORK EXPERIENCE

NielsenIQ

Apprentice, Data Processing Specialist

- Supporting the execution of FMCG data processing workflows within the Project Execution Operations team.
- Assisting in validating and transforming large datasets to ensure delivery accuracy and timeliness.
- Gaining hands-on experience with NielsenIQ's proprietary tools and processes for market data reporting.

Vadodara, GJ

Jul 2025 – Present

V-Ex Tech Solution

Data Analyst Intern

- Developed interactive Power BI dashboards to enhance data visualization and business decision-making.
- Utilized SQL to extract, clean, and manage large datasets for reporting and analysis.
- Automated data workflows using Python, improving efficiency and reducing manual effort.

Vadodara, GJ

Dec 2024 – Mar 2025

Connexion Technologies (CxT)

Frontend Development Intern

- Designed a shopping app prototype with user authentication and seamless navigation for an improved user experience.
- Created wireframes and interactive prototypes in Figma, iterating based on team and user feedback.
- Developed login and signup pages using MongoDB, React.js, and Express.js, ensuring secure authentication.

Vadodara, GJ

May 2021 – May 2021

PROJECTS

NETFLIX CONTENT ANALYSIS

- Conducted a comprehensive analysis of Netflix's global catalog using Python, Seaborn, and Matplotlib.
- Cleaned and visualized data from 8,800+ titles to identify trends in content types, genres, and countries.
- Built interactive insights on content growth, genre popularity, and regional distribution.

Jun 2025

VISA APPLICATION DASHBOARD

- Developed a Visa Application Dashboard using Power BI to analyze trends, processing times, and approval rates.
- Utilized Python for data preprocessing, ensuring accurate insights from large datasets.
- Designed interactive visualizations to help stakeholders identify key patterns and optimize decision-making.

Feb 2025

VISA PAYMENT DASHBOARD

- Developed a Visa Payment Dashboard using Power BI to track payment trends and transaction insights.
- Utilized Python for data preprocessing, ensuring accurate and reliable financial analysis.
- Designed interactive visualizations to help stakeholders monitor payment patterns and optimize revenue management.

Jan 2025

ASSET MANAGEMENT SYSTEM

- Designed a prototype for an Asset Management System to streamline asset tracking and inventory management.
- Created interactive wireframes in Figma and iterated based on usability testing for an optimal user experience.

Sept 2024

ADDITIONAL

Technical Skills: Python, PowerBI, SQL, Figma, HTML/CSS, React.js, MongoDB

Languages: Fluent in English, Native in Gujarati, and Proficient in Hindi

Certifications: Data Analytics with Python (NPTEL & IIT ROORKE), Meta Front-End Developer (Coursera),
The Fundamentals of Digital Marketing (Google)
